

SureSeq

Automation-enabled NGS solutions

More consistency, less hands-on time, greater throughput

In collaboration with **HAMILTON**

With SureSeq™ automation scripts for the Hamilton® NGS STAR MOA, you can reduce manual variability and achieve reproducible results in your NGS runs.

**Key
figures**

Up to 96
samples per batch

65% less
hands-on time
vs. manual prep

2 day
complete workflow

Why automate with SureSeq?

Scale with confidence

Produce up to 96 libraries in under 12 hours

Save time where it matters

Minimize manual touch points with each run

Standardize critical steps

Reduce workflow variability with uniform high-throughput automated liquid handling

Expert support

With a dedicated application team supporting you from set-up to validation and beyond
