Haematology FISH Probes

Features

- Improve confidence in result interpretation with high intensity signals and minimal background
- Enhance detection and scoring accuracy with robust, easy-to-analyse probes
- Save time and minimise mixing errors with easy-to-use, pre-mixed probes
- Optimise stock levels and minimise wastage with flexible pack sizes to meet your needs
- IVDR-certified FISH probes for added safety and confidence

The OGT Partnership

Behind every sample is a life that can be improved through the right care decisions. The OGT partnership approach is key to providing the highest level of service, working closely with you to understand your unique challenges, customising our approach to meet your exact needs.

In 1991, we became the first provider of FISH probes in the world. Over 30 years later, we're the first-to-market with our IVDR-certified FISH probes that play a critical role in the management of patients with haematological cancer.

Choose CytoCell® probes for your FISH analysis; our effective, accurate and simple to use products enable clinical decision makers to reach the right decisions for each patient, every time.
